

Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 22 June —, 1880.

Sir,

As the time of closing our operations in this Department of the Mint is dependent on the Engineer's work at the boilers, M^r Maginnis reports to me that he would greatly prefer our closing our operations on Friday evening at the furthest. To do this, our whole force will be required to work until then at picking all the bricks of every furnace, and of most of the flues, — and then grinding the pickings. To hurry them forward I propose with your consent to let the few men in the sweep cellar do some night work, in order to finish the grinding by Friday evening, the 25th Inst.

Respectfully yours,

J. H. Booth

Hon. A. Loudon Snowden,

M & R.

Superintendent.
